RESPONSE TO RESTRICTION REQUIREMENT

Responsive to the action mailed May 16, 2005, the response period of which is extended to July 16, 2005 by the accompanying petition for extension of time, applicant elects the invention of Embodiment I. The election is made without traverse.

Page 14 discloses a particular functional form of a PERL field, given in equation 27. Claims 1-11 can all be read on methods that use this PERL field and structures that generate this field..

In particular, claims 1-4 do not recite any particular limitation on the functional form of the PERL field. Hence, there is no basis for saying that these claims cannot cover methods that use a PERL field as given in equation (27). Claims 5-8 relate to methods of calibrating a PERL coil. These claims again do not recite any limitation on the PERL field. Claims 9-11 are structures for generating PERL fields. Both structures can be used to generate PERL fields as disclosed on page 14.
